

Environmental policy Paxymer AB

Paxymer AB is part of the Paul Invest group and was founded in 2009. The company sells, produces and makes customer specific developments of the proprietary flame retardant Paxymer.

Our business model is to produce and delivery the patented Paxymer flame retardant system. It is a halogen-free, non-persistent flame retardant that achieve significant improvements to safety in the fire situation as well as the environmental impact of flame retardants. Paxymer was the first fully functional halogen-free flame retardant.

We commit to

- continuously work to improve our flame retardant to incorporate the latest developments in polymer material science to minimize environmental impact.
- offer flame retardant products and deliver functional, alternative solutions with better environmental impact than competing products.
- actively work for substitution of halogens and other persistent chemicals by offering fully functional alternatives.
- gradually implement cradle-to-cradle concepts.
- work actively to minimize our carbon footprint, maximize our resource effectively and minimize our material waste.
